# ID4L

ID4L : Powering Identity

ID4L provides a reliable, secure, and privacy-respecting form of identification that enables users to easily access digital services, transact online safely, and protect their data.

IRIS
Bringing Solutions to Life

Unleashing The Power of Digital Identity

ID4L is a cutting-edge digital identification solution designed to meet the needs of modern citizens throughout life's journey. It is a holistic solution that offers a secure and efficient way to manage personal data while ensuring the utmost protection. Using strong cryptography, such as Public Key Infrastructure (PKI), ID4L guarantees robust digital security.

Key Functions of ID4L

| User Registration & Activation	Secure Access	Biometric Verifier	Virtual Identity Library	IRISeal Visible Digital Seal Solution
Easily verify accounts with government-issued documents.	Facial recognition for safe, authenticated online transactions.	Instant biometric check, using real-time face authentication for precision.	A digital identity hub to manage a lifetime of credentials and control access.	High-security QR with biometric assurance for authentic user data.

* Please note that these functionalities are subject to continuous improvement and customisation to meet the evolving needs and demands of users.

An Easy and Secure Way to Prove Your Identity

Identity Verification | Dependents | Age Verification | Document Verification | Online Authentication | Data Sharing

ID4L Ecosystem

ID4L enhances digital identity experience, forming a powerful ecosystem for individuals, governments, and businesses. This transformational alliance drives digital service evolution while safeguarding user data.

Document Holder → Enrolment + ID Proofing → Register for Digital ID at Self-service Kiosk or Manual Counter → Digital ID Issuance → Access eServices → Access Granted

Document Issuer — Verifier Information
Certifying Authority — Issues PKI Certificate & Digitally Signed Virtual Card
Verifiers — Verifies & Authenticate Digital ID
Return Result

PKI +

Endless Possibilities with ID4L

GOVERNMENT
Register for services, authenticate identity, renew licenses, benefits application & eligibility, etc.

BANKING, FINANCIAL SERVICES & INSURANCE (BFSI)
New account opening, loan/investment application, insurance claims, transfers, endorse legal documents, etc.

EDUCATION
School applications, exam registration, online learning, certifications, and apply for and repay education loans, etc.

eCOMMERCE
Buyer/seller registration, verified account, subscriptions, payment verification, delivery notification, etc.

HEALTHCARE
Register at health facilities, access medical records, track medical status, order medications, book appointments, etc.

OTHER eSERVICES
Will writing, guest check-in, age verification & restrictions, summons check, permits & license verification, etc.

TELCO
New registration & subscriptions, account management, renewal, payment, etc.

ID4L Benefits Governments, Citizens, and Businesses

User-Focused Convenience
ID4L ensures easy digital access, secure transactions, and trusted identity verification in one platform, eliminating the need for multiple eKYC applications. With ID4L, users manage, store, and authorise transactions securely at their convenience.

Enhanced Service Availability & Delivery
ID4L offers effortless access and security. The solution can transform the eGovernment services landacape by facilitating seamless, secure transactions, instant verification, and deploying advanced fraud prevention mechanisms to enable swift benefit applications, license renewals, tax payments, and beyond.

Collaborative & Adaptable Ecosystem
ID4L fosters dynamic collaboration between public and private sectors and adapts to evolving business and technology environments. It seamlessly integrates with other identity services for secure data exchange and accommodates various identity proofing levels; all to reduce costs associated with ID validation and to drive revenue from government services.

Robust Security & Resilience
ID4L prioritises data security. Multi-factor authentication and consented data sharing ensure user privacy. It enforces strong cybersecurity standards for organisations, agencies, and parties. Active management and fraud controls fight identity fraud, losses, and penalties.

Cost-Effective Solution
IRISeal solution is designed to optimise operational efficiency, reducing manual processes and the associated costs. By streamlining document and product verification through digital sealing, businesses can save valuable time and resources, resulting in long-term cost savings.

Our Secure Solutions

We offer comprehensive, sustainable, highly adaptive, and customisable Trusted Identification software and solutions that are built on secure platforms and architecture. Our proven solutions unify security, inventory, workflow, and lifecycle requirements while managing enrolment, production, issuance of physical, electronic and digital documents such as identity cards, ePassports, driver's licenses, voter cards, travel visas and many more.

Why IRIS ?

We are a globally recognised technology-driven company with dual-certifications as a security printer and security supplier. Our experience of more than 25 years has allowed us to pioneer numerous break-through identity products and solutions for greater national and trans-border security - inventing the world's first ePassport and the world's first multi-application National ID card. Our comprehensive range of trusted identification solutions span the globe. From the manufacture of smartcards and secure travel documents to the devices and software architecture required for authentication, we continue to integrate disparate technologies that are Innovative, Relevant, Intelligent and Secure to bring to life solutions that are sustainable.
