

IRIS Voter ID and Management Solution

Revolutionise your elections with IRIS Voter ID and Management Solution — where technology meets democracy, empowering voices, one vote at a time. IRIS ensures every vote counts, paving the way for a democratic future that is not only stronger and fairer but also transparent and inclusive, because every vote matters.

Voter ID Registration

Voter ID Management

Voter ID Verification

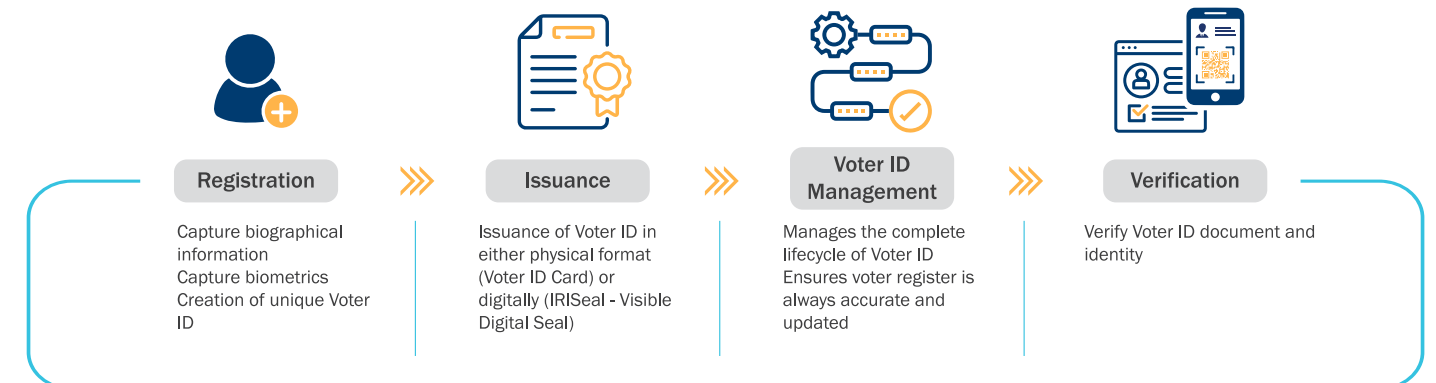

Voter ID Issuance

IRIS Voter ID and Management Solution (VIMS)

IRIS comprehensive voter registration and management system facilitates the voter registration process, from the biometric enrolment (facial, fingerprint or iris) of the population to the verification of the biometric data by Automated Biometric Identification System (ABIS) to ensure that each voter is verifiable and enrolled only once.

How it works?

Voter ID registration, identification, and verification processes can be implemented through a variety of technological solutions, including manual workstations, biometric tablets, handheld terminals, or Mobile Enrolment/Verification Units (MEU/MVU). These systems offer flexible and scalable options to cater to different operational needs, ensuring secure and efficient voter management.

Efficiency Meets Sustainability

Voter registration, a cornerstone of democratic governance, is deemed as one of the most crucial tasks of election administration. However, it can be extremely complex, time-consuming and costly, involving various local and national authorities, and varies widely across countries.

Some nations derive voter registers from civil registers for broader purposes like national ID issuance or social benefit distribution, others maintain separate, election-specific databases. Regardless of the system, it should be transparent, accurate, and allow voters to easily rectify errors. Importantly, the chosen method should be sustainable long-term.

Our solution, Voter ID and Management Solution (VIMS), assists electoral commissions in modernising voter registration and enhancing voter lists with seamless voter registration, robust data deduplication and management, and advanced biometrics. It aims to streamline processes, improve record accuracy, and reduce costs, thereby bolstering the integrity of the voter registers. By integrating these elements, states can eliminate labor-intensive, wasteful, and error-prone procedures to ensure transparent elections and empowers citizens, marking a significant stride in democratic processes.

Key Features

Diverse Registration Channels

Structured and Transparent Registration Workflow

Biometric Identity Capture and Verification

Accurate and Complete Voter Database Management

Personalised Unique Voter ID

Why Choose IRIS Voter ID and Management Solution?

Automated and Digitalised

Diverse Data Input Technologies

Enhanced Security Controls

Instant Verification and Authentication

Accurate and Reliable Voter ID Database

Multimodal Biometrics Identification and Verification

Versatile, Scalable and Future-Proof

Public Verification Access

Accessibility and Multilingual Support

Analytics and Reporting

Our Secure Solutions

We offer comprehensive, sustainable, highly adaptive, and customisable Trusted Identification software and solutions that are built on secure platforms and architecture. Our proven solutions unify security, inventory, workflow, and lifecycle requirements while managing enrolment, production, issuance of physical, electronic and digital documents such as identity cards, ePassports, driver's licenses, voter cards, travel visas and many more.

IRIS eID and Digital Identity Solution

IRIS ePassport Solution

IRIS Border Control Solution

IRIS Driver's License & Vehicle Registration Solution

IRIS Voter ID & Management Solution

IRIS eVisa Solution

IRIS Smart Card Solution

IRIS Secure Document Solution

IRIS Smart Kiosks

IRIS Smart Devices

Why IRIS ?

We are a globally recognised technology-driven company with dual-certifications as a security printer and security supplier. Our experience of more than 30 years has allowed us to pioneer numerous break-through identity products and solutions for greater national and trans-border security - inventing the world's first ePassport and the world's first multi-application National ID card. Our comprehensive range of trusted identification solutions span the globe. From the manufacture of smartcards and secure travel documents to the devices and software architecture required for authentication, we continue to integrate disparate technologies that are Innovative, Relevant, Intelligent and Secure to bring to life solutions that are sustainable.
